## Slow and advanced learner activity details.

The institute provides greater freedom to the departments, to decide the policies and methods to identify slow and advanced learners. Departments set different criteria to identify slow and advanced learners like marks obtained in previous examination, viva, oral tests, responses to class questions, marks obtained in unit tests. This approach helps to identify the learning ability of the students, based on which the student is categorized as either slow or advanced learner. This classification helps to build strategy to develop a learner centric approach. Accordingly, slow and advanced learners are mentored, special classes were organized, counselling was done, they were motivated to participate in quiz, competitions, projects, exhibitions.

The department wise details are as follows.
